

ART Lime Marble Plaster

Mineral finishing plaster

There are no limits with the mineral ART finishing plasters when it comes to designing the structure, feel, filling and colours. The plaster for wall and ceilings claddings contains slaked lime and crushed Carrara marble, materials which contribute to the natural indoor climate thanks to its diffusion. Especially sustainable, breathable and IMO-certified, it forms an extravagant finish – also with protective coating or sealing.

- mineral, fine chalk marble
- many natural materials
- protective coating or sealing.
- individual surfaces
- available in RAL and NCS-colour shades
- no VOCs
- special structure and individual haptics
- IMO-certified
