

# REGULARline

## Further Perforations

A wide selection of further REGULARline perforations is available - you can choose between different round holes, square holes and slotted holes. Perforated metal ceilings are acoustically effective when combined with sound-absorbing inlays on the rear side.

- wide selection of perforations with round holes, square holes and slotted holes
- acoustically effective in combination with sound absorbing inlays

### Acoustics

#### Building acoustics

Equipped with acoustic inlays, perforated surfaces achieve very high sound absorption values

### Fire protection

#### Building material

Building material class	DIN EN 13501 1	A2 - s1,d0
ASTM E 84	ASTM E84	class A

### Durability

Exposure class	DIN EN 13964	A
