## FLOOR and more® comfort CLT

Dry hollow floor with underfloor heating on cross laminated timber ceiling

The dry hollow floor system FLOOR and more<sup>®</sup> comfort creates a pleasant environment for the occupier by its intelligent heating and cooling. The hollow floor panels type comfort consist of fibre-reinforced calcium sulphate. Pre-milled grooves for taking up the heating and cooling lines are closed after the installation by a filling compound. The gluing of the FLOOR and more<sup>®</sup> panels is made with a special tongue and grooving at the edges of the panels which are forming a closed load bearing layer. The substructure consists of height-adjustable zinc-coated steel pedestals from our own production which form the necessary cavity for installations.

The hollow floor panels FLOOR and more<sup>®</sup> in combination with a dry mineral fill and a decoupling level create the necessary weighting of the solid wood ceiling, which can optimally be used as substrate for the necessary installation.

- quick reaction period with heating and cooling
- heating performance 66 W/m<sup>2</sup> 76 W/m<sup>2</sup>
- cooling performance 33 W/m<sup>2</sup> 40 W/m<sup>2</sup>
- superb walking comfort
- very good building acoustic characteristic values
- high loadability
- non-combustible
- free choice of coverings
