

## CAS Rooms: Room-in-Room Systems for Dynamic Office Landscapes

With CAS Rooms – a product developed by Ege Carpets (formerly Carpet Concept), Lindner, and GiB Innovative Bautechnologie mbH – Lindner offers a modular room system that meets the demands of modern work environments. With a clear focus on flexibility, individuality, and sustainability, the CAS Rooms adapt perfectly to various needs.

Whether as quiet retreats for focused work, meeting rooms, or versatile workspaces, CAS Rooms provide tailored solutions that optimise the available space while creating a pleasant working atmosphere. High-quality textiles not only offer an appealing look but also enhance acoustic performance, contributing to a productive working environment.

### **Sustainability and Quality at the Highest Level**

With their superior craftsmanship and the use of sustainable materials, CAS Rooms set new standards in quality. The soundproof materials effectively reduce noise inside the CAS Rooms. Additionally, the elements are not only easy and quick to assemble due to their modular design but are also reusable, promoting resource conservation and providing economic advantages. Independent ventilation systems and dimmable LED lighting additionally ensure a comfortable room climate.

### **Flexible and Individual Design**

CAS Rooms is a flexible modular system that impresses with extraordinary design freedom thanks to its wide range of components. This includes glazing elements and textile wall panels that facilitate harmonious room design. These are complemented by textile ceiling elements and wall panels made from high-quality real wood veneer or HPL. Glass doors and wooden doors are also available in a variety of dimensions. For textile surface design, there are 11 fabric collections with over 450 colours to choose from.

Room sizes can also be individually customised in practical 200 mm increments, ranging from 1000 x 1200 mm to 3400 x 7000 mm. This flexibility allows CAS Rooms to be integrated into both new buildings and existing office spaces, optimally adapting to specific requirements.
