

Bank Coop Headquarters

Basel, Switzerland

Project Description

Doors for Partition Systems

Bank Coop is one of the leading Swiss Bank institutions with focus on private and small to medium-sized corporate customers. Its name emphasises the bank's endeavour to establish partnerships towards customers and employees. This traditional institution controls its actions as a subsidiary of Basler Kantonalbank at its headquarters in the heart of Basel. These facilities, including office and conference areas, have been redesigned and modernized.

In this course, the Swiss subsidiary of Lindner AG was contracted with the production and installation of glass partition systems of type Lindner Life Freeze 137 in connection with doors type Lindner GTB 100. Featuring an integrated booking system, they support the planning of meetings. For extra discretion, milk glass elements have partially been executed.
