

EUROPA-CENTER Akzento

Essen, Germany

Project Description

The EUROPA-CENTER Akzento has been designed and implemented architecturally by EUROPA-CENTER AG, an owner-managed real estate group headquartered in Hamburg. Near the Essen city center, it offers approx. 9,400 m² of rental space for office and hotel use. The building's sustainable concept was awarded with the DGNB Gold certification.

Lindner contributed extensive trades to the interior fit-out of the EUROPA-CENTER Akzento. Among those is the entire drywall work for ceilings and walls in the building. In addition, Lindner metal ceilings were fitted both in the form of canopy ceilings and corridor ceilings. By perforating these panels, they add to the optimization of the room acoustics. Doors also fulfill both functional and visual requirements in the EUROPA-CENTER. As smoke protection doors, they make an important contribution to the fire protection concept of the building. Lindner was responsible for their installation.

Completed Works

- **Doors**
Wooden doors
- **Dry lining**
Plasterboard ceiling systems
Plasterboard partition systems
