

# **Alpen-Adria-University**

Klagenfurt am Wörthersee, Austria

# Project Description

FLOOR and more® arena

400 sqm

At the Alpen-Adria-Universität Klagenfurt extensive renovation work was carried out in the northern and central tract. The renewal of this infrastructure, most of which dates back to the 1970s, was a response to the University's good development in recent years. The measures brought more light, transparency and a contemporary sense of space into the buildings. In addition to the appearance, functional and energetic optimizations were made.

The lecture halls 1 to 4 were also fundamentally renewed and changed into light-flooded study rooms. The Lindner GmbH from Baden contributed the auditorium construction based on the floor system FLOOR and more® arena.

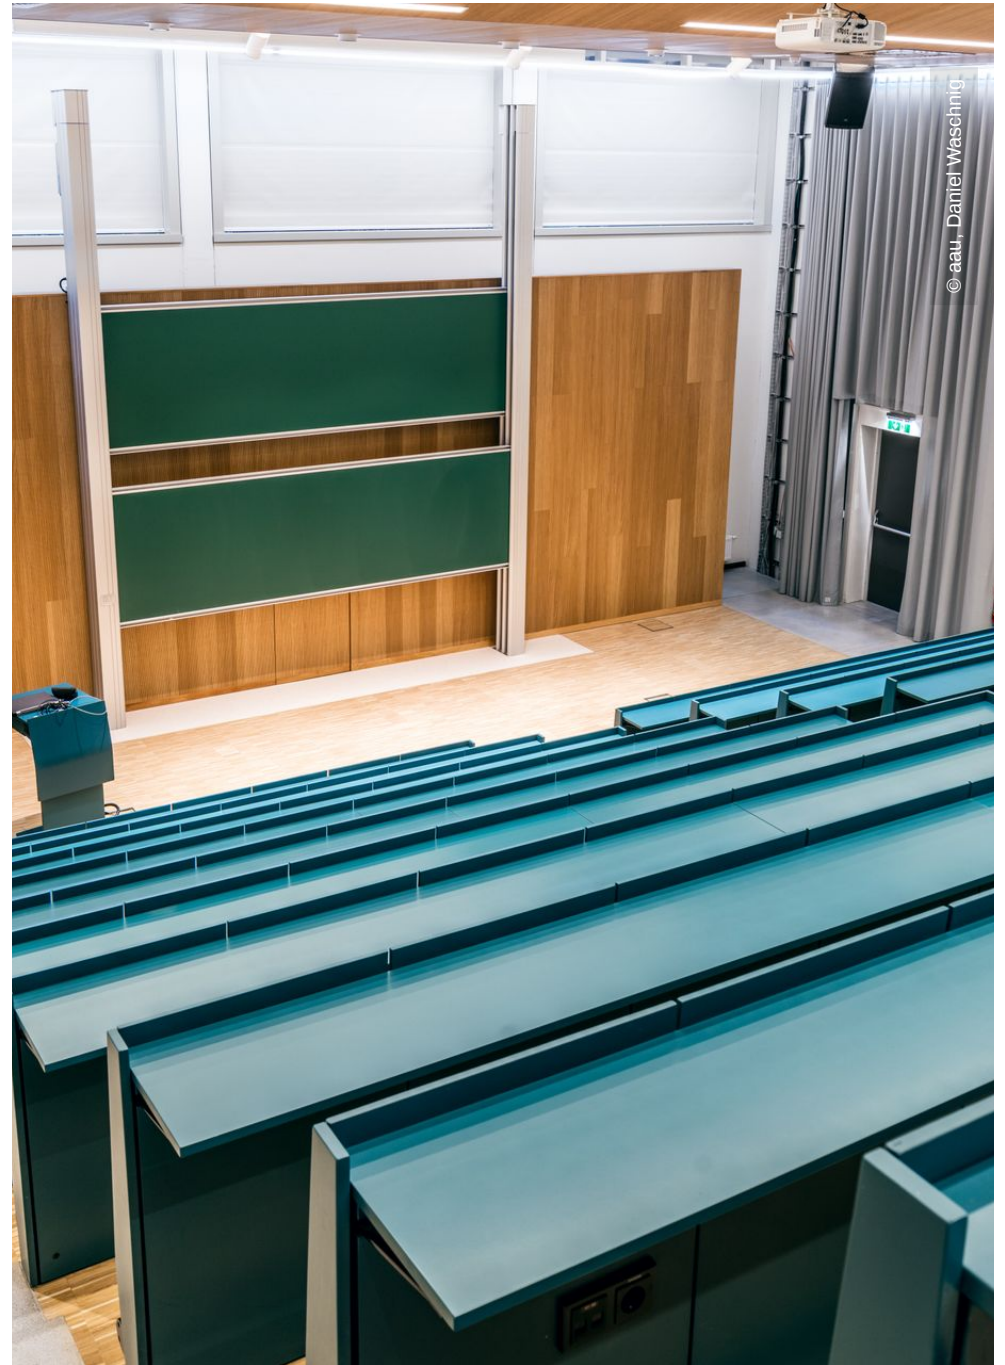

## General

<b>Building Type</b>	Schools
<b>Company Division</b>	Lindner GmbH
<b>Completion</b>	2018
<b>Client</b>	Bundesimmobiliengesellschaft m.b.H.

## Completed Works
