

Sports hall Carl Fuhlrott school

Erkrath, Germany

 **Lindner**

Project Description

The pupils of the Carl Fuhlrott School in Erkrath can look forward to the resumption of school and club sports in the school's own gymnasium: After completion of the renovation work, the sports hall from the 1970s impresses with a new ceiling and lighting system. For this purpose, the old wooden ceiling was demolished and replaced by a bright Lindner metal ceiling. Modern luminaires with presence detectors as well as a stable substructure ensure optimum lighting conditions and maximum safety.

Lindner planned the ceiling system and carried out the lighting calculations: The installed LMD-E 213 BWS suspended ceiling was designed to be ball-proof and impresses with its elegant design and revision option.
