

Porsche Zenter Roost

Bissen, Luxembourg

Project Description

Porsche is the world's most successful sports car manufacturer, with another record year in 2021. For many years, the brand has been distributed in Luxembourg by André Losch. In addition to the Porsche Zenter in Lëtzebourg, the second car showroom - Porsche Zenter Roost, which Lindner has expanded in various areas with the subsidiary Luxembourg sàrl, opened in July 2021 30km away.

As a complete service, Lindner provided the static measurement, the production of all necessary connections and the assembly of the partition wall systems. One third of the 300 m² of Lindner Life 620 glass partitions were installed as fall-proof glass wall constructions. The majority of the glass partitions are used in a timeless design as partitions in the upper offices, which rise above the sales area, in the stairwell and in the garage of the luxury car saleshouse. In the offices, they are combined with numerous glass doors framed in a plain black frame.
